Statement of Mission, Vision and Strategic Goals

Mission
The North Shore-LIJ Health System strives to improve the health of the communities it serves and is committed to providing the highest quality clinical care; educating the current and future generations of healthcare professionals; searching for new advances in medicine through the conduct of bio-medical research; promoting health education; and caring for the entire community regardless of the ability to pay.

Vision
To be a national healthcare leader, committed to excellence, compassion and improving the health of the community.

Strategic Goals

Quality
To become the leader in providing quality healthcare which can be defined and measured.

Research
To improve the human condition by advancing disease-oriented, basic scientific and clinical research.

Education
To provide an exceptional learning environment.

Operational Performance
To act as a system and to be recognized as the provider of choice which is operationally efficient and financially successful.

Service Excellence
To provide an environment in which patients, their families, and physicians are highly satisfied with the services provided through the health system.

Workforce Development
To become the employer of choice through the development and support of a competent, motivated and productive workforce.

Promoting Community Health & Advocacy
To become an indispensable community asset by responding to identified health needs through education, advocacy, partnership and programs which result in improved access to care and health outcomes.

Physician Partnerships
To become the preferred hospital partner for physicians practicing in the service area.
